A trusted workstation partner

For mission critical production environments

Secure, certified and ergonomic workstation solutions for defence and high-reliability manufacturing

Treston – Trusted partner of the defence industry

For defence sector organizations, security and reliability are non negotiable. Production environments must protect sensitive electronics, support operators during demanding work, and remain dependable for decades. On the other hand, defence manufacturers require suppliers whose stability, production location and supply chain can be trusted over decades.

For more than half a century, Treston has been a trusted name in European industrial workspace solutions. Treston provides ESD Proof and ergonomic workstation solutions trusted by manufacturers of mission-critical technologies across Europe.

Established in 1969, Treston has built its reputation on certified safety, modular workstation systems and long lifecycle availability. All this supports defence sector today and in the future.

Strategically secure partner

Treston's manufacturing sites are in Finland and carry strategic importance: they ensure a secure, transparent and resilient, short supply chain that meets the high expectations of defence clients.

Quality management at the core

Our facilities operate under strict quality management systems, according to certified processes, providing the assurance that every product is built to extremely high standards. Treston's operations follow ISO certified processes, ensuring consistent excellence in everything we design and manufacture, as well as Lean-philosophy ensuring continuous improvement on every aspect.

Strong presence across Europe

With a strong local presence across Europe, in five countries, Treston supports customers with local sales and support teams, expertise, fast response times, assembly services, and a commitment to lasting partnerships.

Strong European presence with local support | Treston operates through its own subsidiaries and trusted partners across Europe, ensuring responsive local service, application expertise, and dependable delivery in demanding environments. **Headquartered and manufactured in Finland. Subsidiaries in Germany, France, the UK, Sweden, and the USA.**

Why defence customers choose Treston

- **Proven, stable partner.** Established in 1969 and trusted by industrial and defence manufacturers world-wide, choosing Treston means long term reliable partnership.
- **European manufacturing.** Having production in Finland, a NATO-member country, ensures our customers short, secure and transparent supply chain, and dependable lead times.
- **Certified quality.** We fulfil ISO quality and environmental management standards and offer ESD and cleanroom certificates. Our products are also backed with 10-year warranty. Our customers don't need to worry about compatibility; they can focus on their performance.
- **Long-term solutions.** Modularity, durable materials, and long term availability of Treston's high-quality products ensure our solutions last for decades. Solutions grow and scale according to our customers' needs contributing to high life-cycle value.

Our manufacturing factories in Finland ensure short, secure and transparent supply chain, and dependable lead times.

- **Custom-made solutions.** When standard in-stock solutions are not enough, we can quickly, cost-efficiently, and securely design and manufacture fit-for-purpose solutions for customers requirements.
- **Experience.** Treston's ESD and ergonomics knowledge combined with experience from defence sector installations helps us guide our customers select the viable setups for their needs.
- **Local presence.** Treston has sales offices and support across Europe, in five countries via our own offices, and in 30+ countries via our valued distributor partners. Our customers value local expert assistance and support from project planning to installation.
- **Long-term value.** Treston workstations are designed for decades of use. Durable materials, modular upgrades and spare part availability reduce replacement needs, equalling to low total cost of ownership.

ESD-safe configurable **workstation solutions**

Treston workstations are designed to protect sensitive electronics and support demanding industrial workflows.

Inherently ESD-safe design - Compliant and certified

- Compliant with international ESD standards, IEC 61340-5-1, IEC61340-6-1, and ANSI S20.20.
- Designed from the beginning to service in ESD environments – special conductivity-enabled design & ESD Proof painting.

Ergonomic performance

- Height-adjustability, modularity and accessories enhance operator comfort and safety during long shifts and improve operator productivity.
- Innovative conductive ESD paint reduces the need for separate grounding, enabling cleaner and safer workspace.

Durable construction

- Industrial-grade materials ensure reliability in demanding environments.
- 10-year warranty - A reflection of the long lifecycle and durability of Treston solutions.

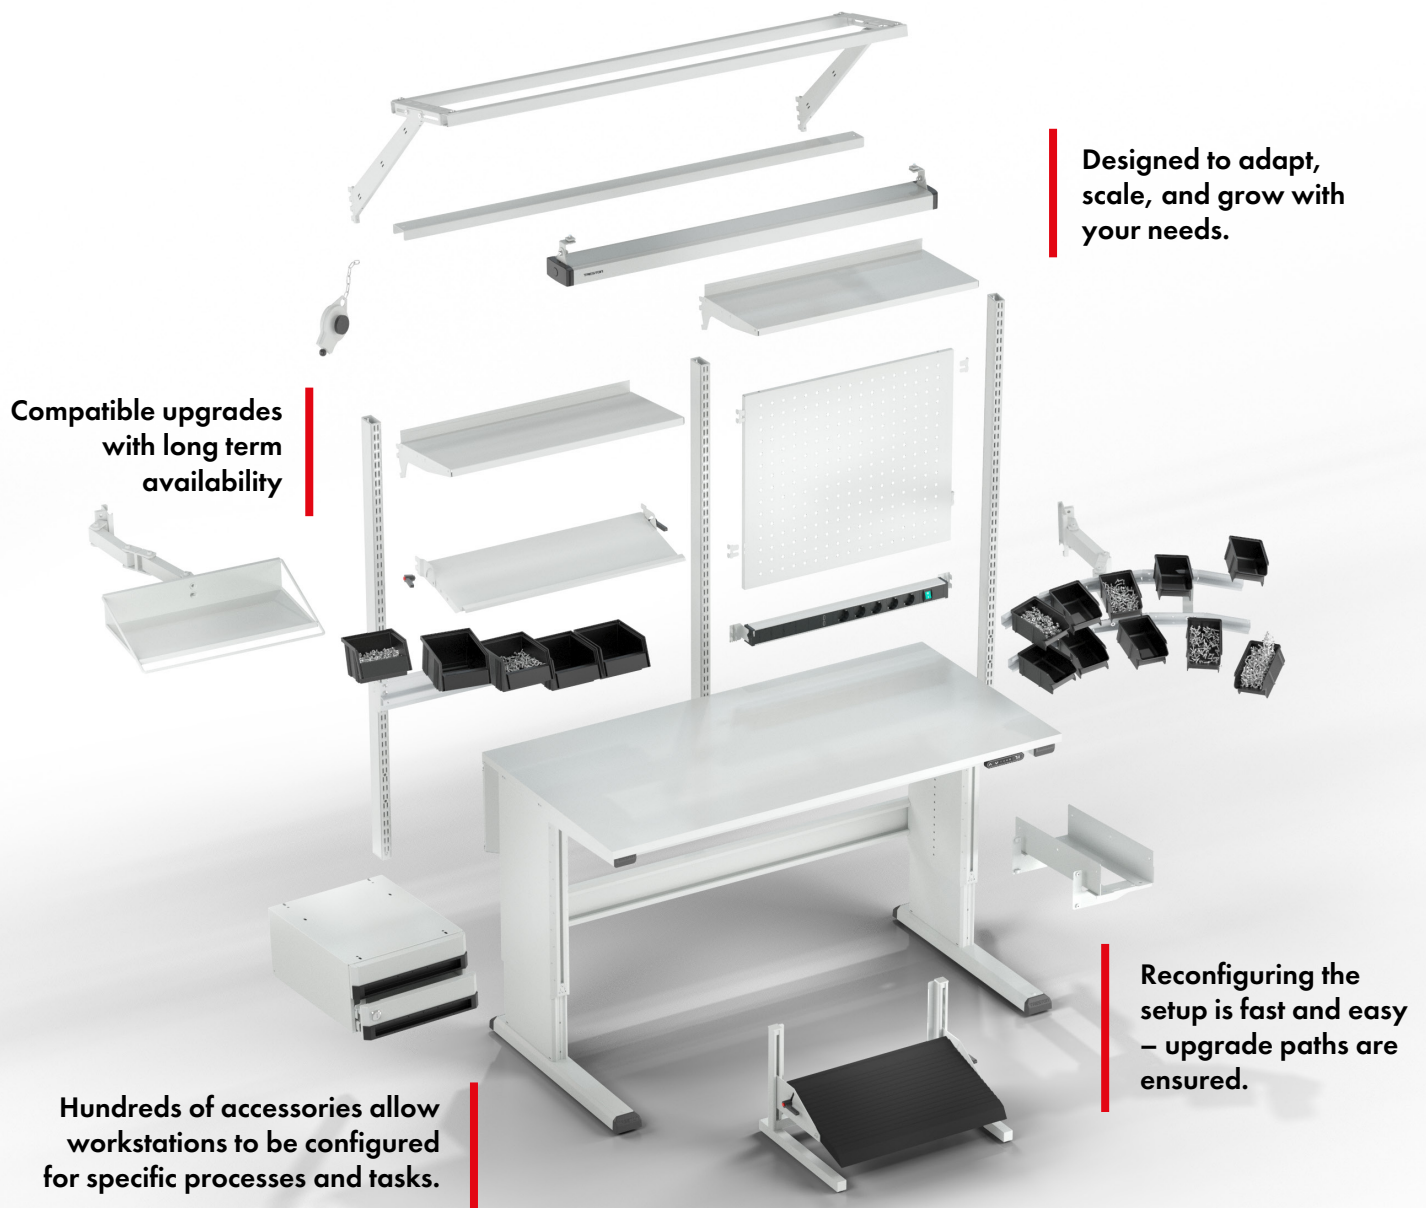

Comprehensive ESD product range

- Workbenches, storage systems, trolleys, drawer units, chairs, lights and over 300 workstation accessories.
- Power-independent solutions.
- Custom-built solutions ensuring each workspace supports the exact needs of the operation.

“ESD proof, modular and ergonomic solutions reduce your operational risks in mission critical work”

Modular workstation systems ensuring **upgrades are easy**

Designed to adapt,
scale, and grow with
your needs.

Compatible upgrades
with long term
availability

Hundreds of accessories allow
workstations to be configured
for specific processes and tasks.

Reconfiguring the
setup is fast and easy
– upgrade paths are
ensured.

Solutions that evolve with your operations

Defence manufacturing environments change as technologies evolve.
Treston workstation systems are designed to adapt over time.

Upgrade paths

Modular systems allow workstations to be expanded or reconfigured without replacing entire installations.

Long lifecycle availability

Products remain available for extended periods, supporting long-term programs.

Customization capability

Treston also develops tailored solutions for specialized production environments.

A strategic partner for defence projects across Europe

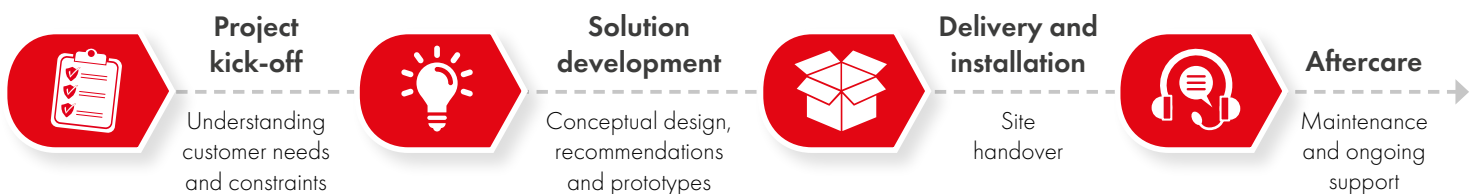

From concept design to full deployment — Treston supports every phase — today and in the future.

Treston supports customers from workstation configuration to full production environment planning.

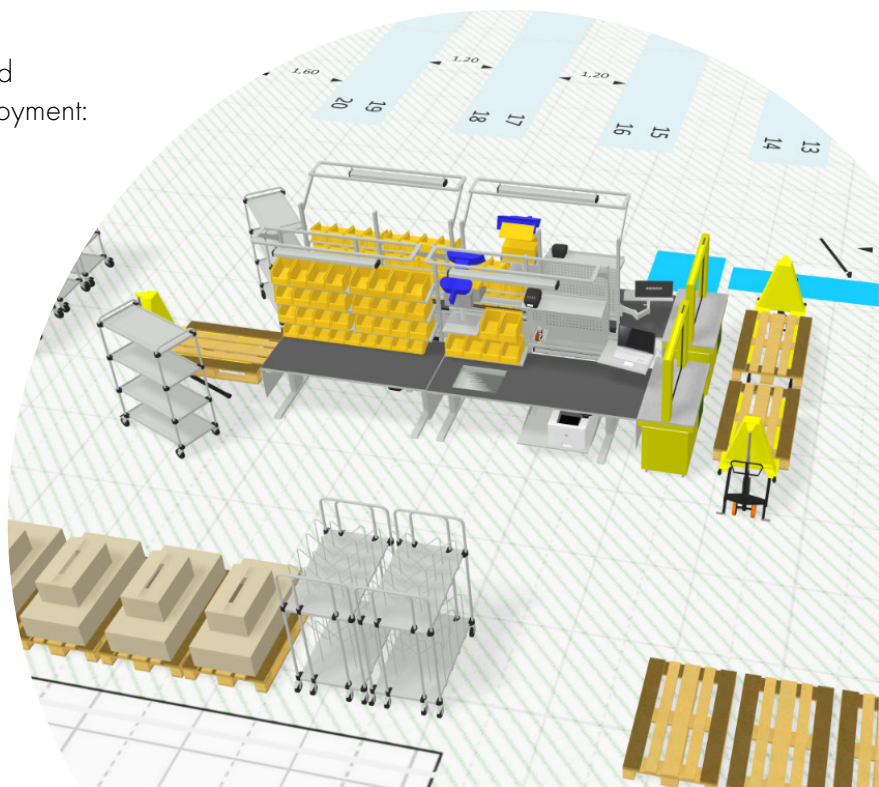

Our experts work with you to design workstation solutions that support your processes today and remain adaptable for the future.

Project sales roadmap

Treston collaborates with engineering, facilities and procurement teams throughout planning and deployment:

- CAD files
- configuration guidance
- accessory selection
- modular scalable solutions
- custom-made solutions
- installation support

Work environment solutions built for every stage of the defence manufacturing

Defence related electronics and precision systems demand environments where reliability, safety and traceability are guaranteed. Production teams must protect sensitive components, maintain strict quality standards and operate efficiently even during long shifts. Workstations need to be robust, configurable and certified – designed for handling sensitive electronics.

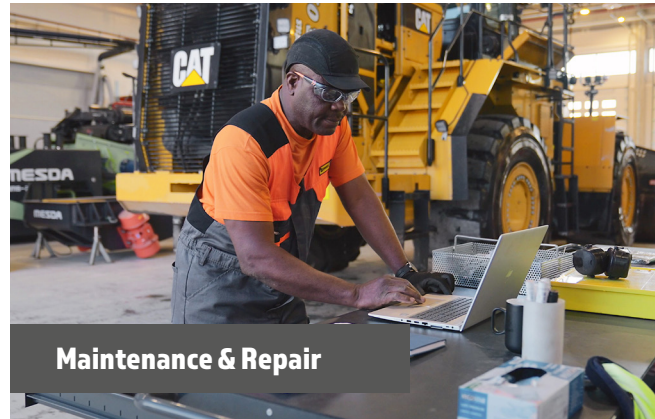

Treston solutions support these environments with proven ESD protection, ergonomic design and modular configurations that adapt to changing needs.

Trusted by manufacturers of:

- military systems
- avionics electronics
- satellite technologies
- radar systems

Electronics assembly

Maintenance & Repair

Cleanrooms & Laboratories

Field logistics

Certified to meet international standards for **demanding environments**

ESD certification IEC 61340-5-1

- **ESD workstations** (Concept Ergo electric and allen key adjustable workstations, WB electric adjustable workstations, QuatreX, TED, TP and TPH workstations)
- **ESD chairs** (Treston Ergo, Treston Plus, Neon, Flex, Stool, SADDLE)
- **ESD trolleys** (Multi Industrial trolleys, SAP trolleys)
- **ESD storage bins** and bin cabinets

Treston workstations and furniture have been the benchmark in high-quality ESD furniture for over 40 years. Our ESD Proof products are designed to be inherently ESD safe, and they are ESD certified and compliant with **IEC 61340-5-1, IEC61340-6-1, and ANSI S20.20** standards.

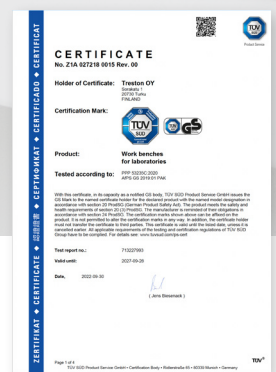

Cleanroom suitability ISO 14644-1 class 7

- **ESD workstations** (Concept Ergo electric adjustable ESD workstations, WB electric adjustable ESD workstations, QuatreX ESD workstations, TED ESD workstations)
- **ESD chairs** (Treston Ergo chair C20PU-ESD)
- **ESD storage bins**

ESD Proof by Design™

With Treston solutions you can rest assured you create workspaces where safety, comfort, and performance go hand in hand. Treston workstations and furniture have been the benchmark in high-quality ESD furniture for over 40 years. ESD protection is built into the very foundation of our ESD workstation solutions.
